

Care Sector Management Contingency

Interim management support when you need it

The COVID-19 situation is moving fast.

Staff shortages are widely anticipated in the care sector, not just among care workers, but also operational managers and leaders within corporate functions.

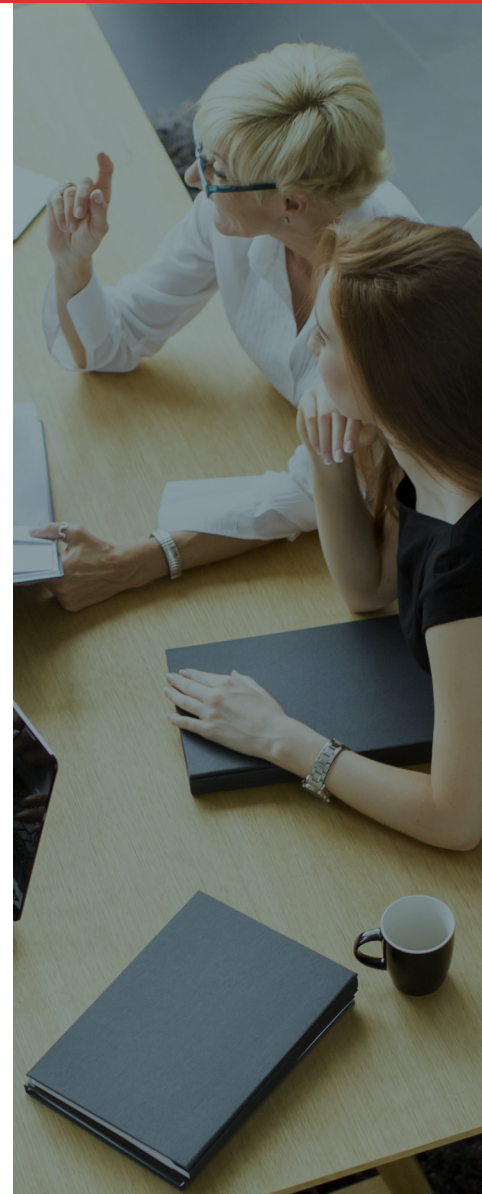

Our interims are ready to step in and provide leadership and direction, so you can continue to meet operational demand, and maintain adherence to CQC standards.

We can deploy experienced managers rapidly, to cover absence due to illness or self-isolation, and help you do all you can to protect the vulnerable residents in your care.

Specialist interims in place at short notice

When speed is of the essence, we can cover gaps fast. Our network of interims includes:

- Registered managers: cover for individual care homes
- Operations managers: senior managers to oversee broader operations
- HR: specialist support in dealing with staffing and people issues
- Finance: experts in managing cashflow during crisis situations
- Risk/crisis management: specialists in identifying and mitigating short and longer term risk

Contact us now

Please get in touch now, even if you currently have a full leadership team. If you let us know your potential future demands, we can act faster when you do need our support.
